Total cost of the six-year programme

about Rs 28.64 lakh, which changes according to the university's and country's regulations and other relevant factors. Food, flights and personal expenses add another significant category of overall expenditure in your 6-year journey, depending on the specific location where you live (both in India and abroad), lifestyle habits, and how much the university charges for miscellaneous expenses (laptop, textbooks, etc.).

NOTES

Note: The shown values are based on the university's prevailing tuition fees for international students and other estimated expenses. These are subject to change depending on different factors, including policy changes, inflation rates, and exchange rate fluctuations. The Indian values presented are based on an exchange rate of $1 = Rs 90.

Fees are set in US dollars by the university and the rupee equivalent moves with the exchange rate. Confirm current figures with the admissions office before budgeting. This document is published by BrightRoute Consulting LLP, which is not affiliated with, endorsed by or sponsored by the university.
